

# DENTALORE

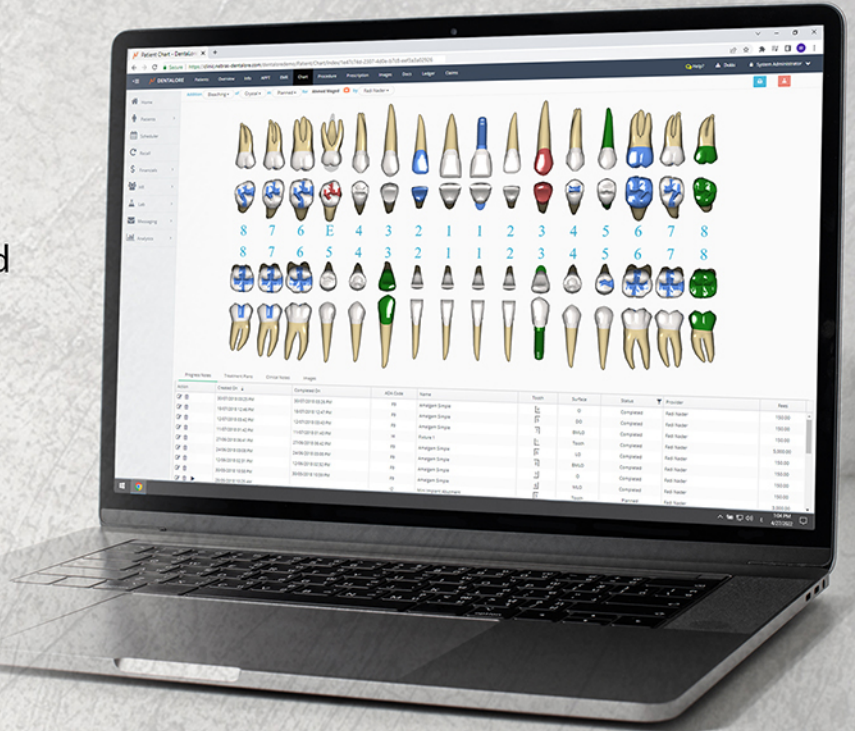

## Cloud Dental Software

# 3D Chart

Offer your patients a personalized experience with a dedicated file containing their essential information, medical history, and a detailed 3D model of their teeth. This powerful tool allows you to diagnose their condition, design tailored treatment plans, and seamlessly share specific instructions for each procedure.

# Educational Videos

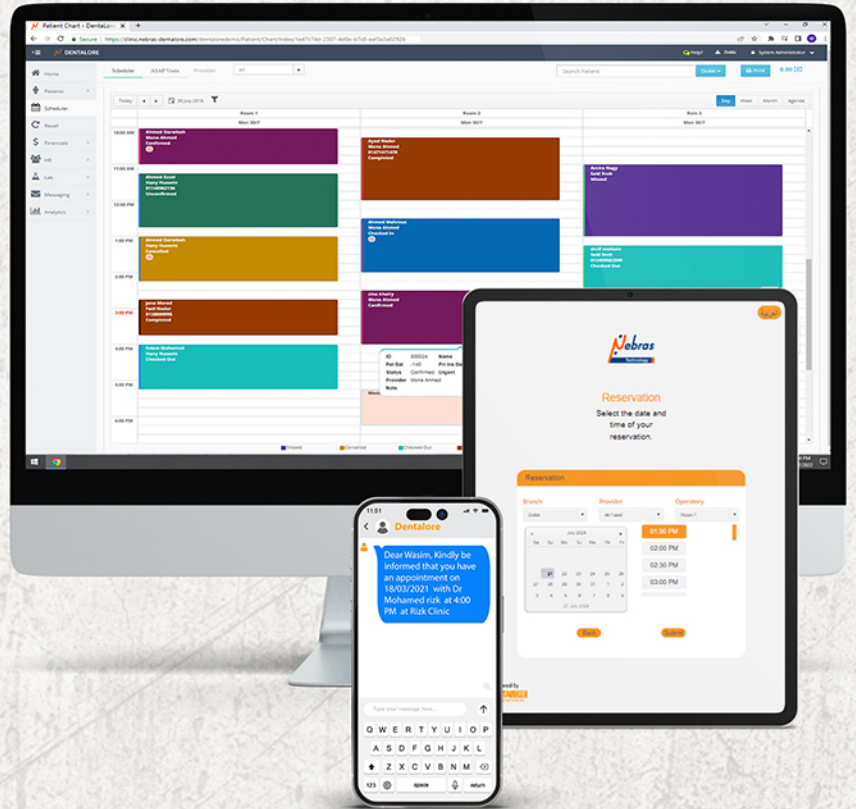

Enhance patient trust by explaining treatment plans through engaging Educational Videos. Whether you have one or more treatment options, these videos make it easier to inform your patients and show them the benefits of their chosen plan.

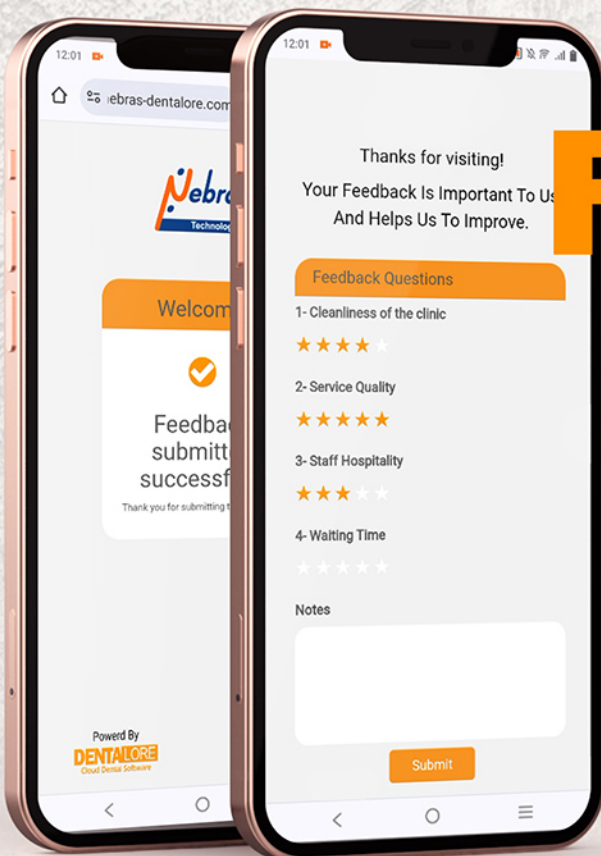

# Efficient Scheduling

Let your patients take control of their appointments! With the ability to create their own profiles and book appointments directly from available slots, your clinic's scheduling is more efficient than ever. A color-coded system ensures smooth management, and automatic confirmations ensure peace of mind for both you and your patients.

# Feedback

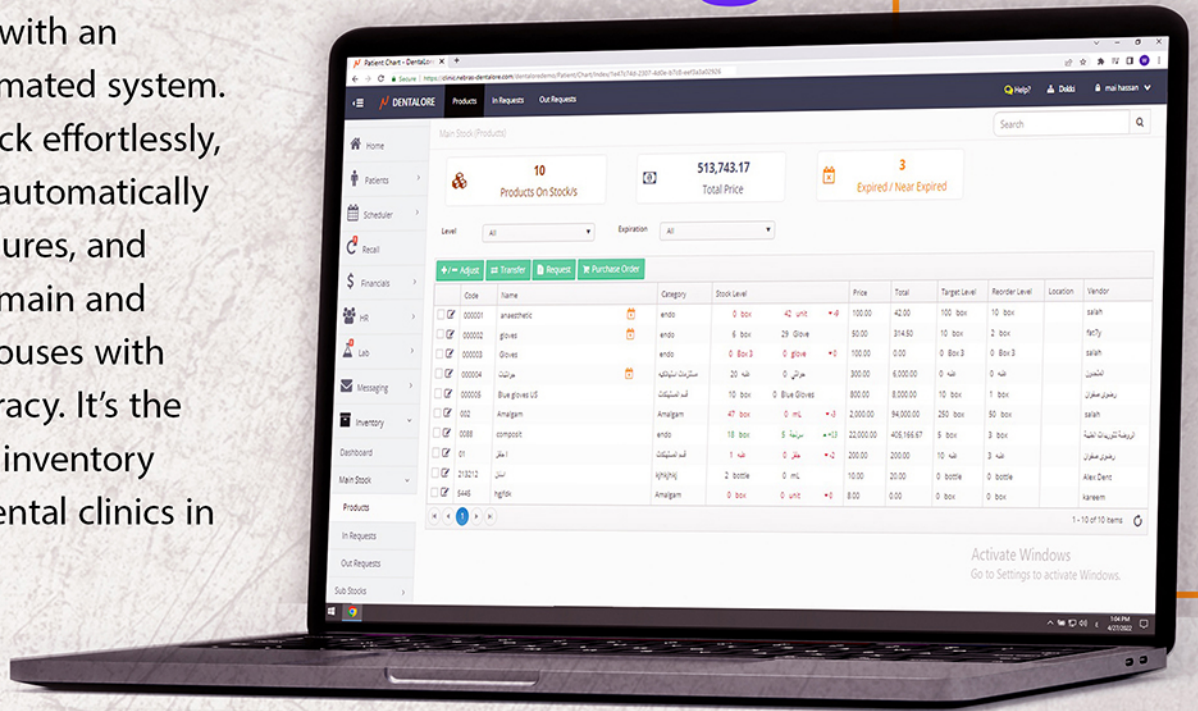

Improve your service with real-time feedback! After each visit, automatically send a tailored survey to your patients, collecting valuable insights on service quality, wait times, clinic cleanliness, doctor ratings, and more—so you can constantly refine the patient experience.

# Inventory Management

Streamline your inventory management with an intuitive, automated system. Track your stock effortlessly, deduct items automatically during procedures, and manage your main and branch warehouses with pinpoint accuracy. It's the most efficient inventory solution for dental clinics in Egypt.

# Insurance Module

Simplify insurance claims management by adding all the insurance companies you work with, along with their prices and plans. Keep track of each company's claims, what's been paid, and what's still pending—plus, keep insurance patient payments separate from cash patient payments.

# Financial Management

Take full control of your clinic's finances with powerful financial tracking. Monitor daily revenue and expenses, or assess finances over any period you choose, ensuring you always have a clear view of your clinic's finances.

# Analytics and Insights

Leverage data-driven insights to boost your clinic's performance. Identify the most profitable procedures, the top patients by treatment, doctor productivity, and overall clinic income. Track the status of treatment plans, new patient numbers, and appointment trends—all in one place.

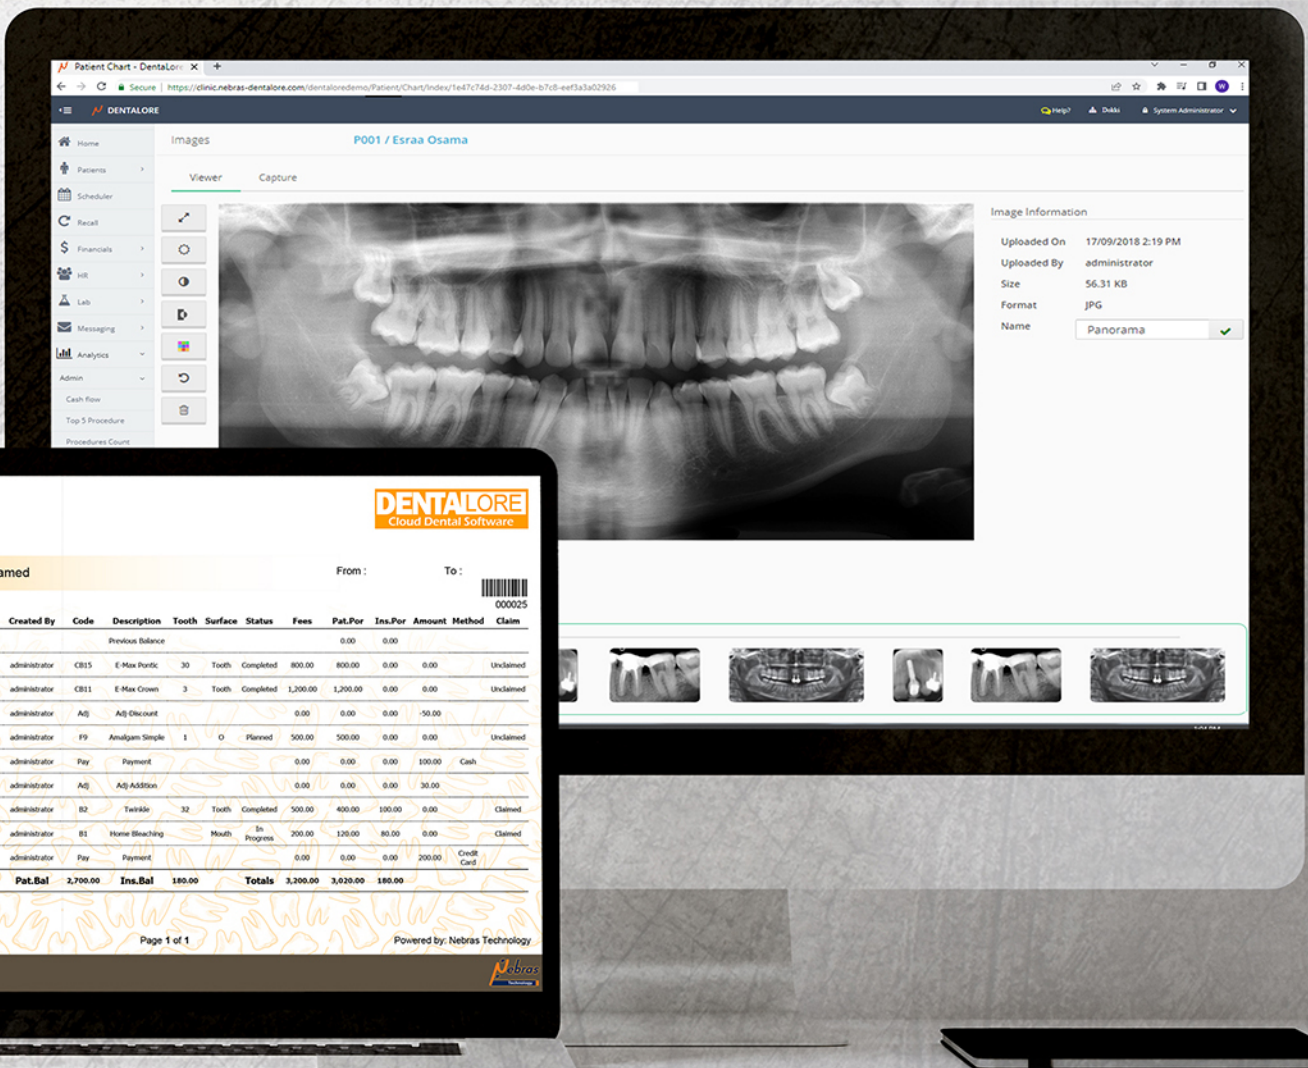

# Prescription Management

Write, print, and customize your prescriptions with ease using Dentalore's electronic prescription tool. Designed with your brand in mind, you can select from a variety of attractive templates that ensure professional presentation.

# Image Management

All of your patients' dental images and X-rays are stored securely in one place. With Sensor Integration, these images are automatically linked to each patient's profile, ensuring accurate tracking of their health and progress—without the need to switch between different software platforms

# Lab Case Management

Stay organized and efficient with detailed reports for all lab cases and accounts. View case statuses at a glance, ensuring you never miss important updates.

# Patient Ledger

Get a comprehensive view of each patient's procedures, payments, and insurance claims. It's easy to track everything in one place, providing a seamless experience for both you and your patients.

# Marketing & Patient Communication

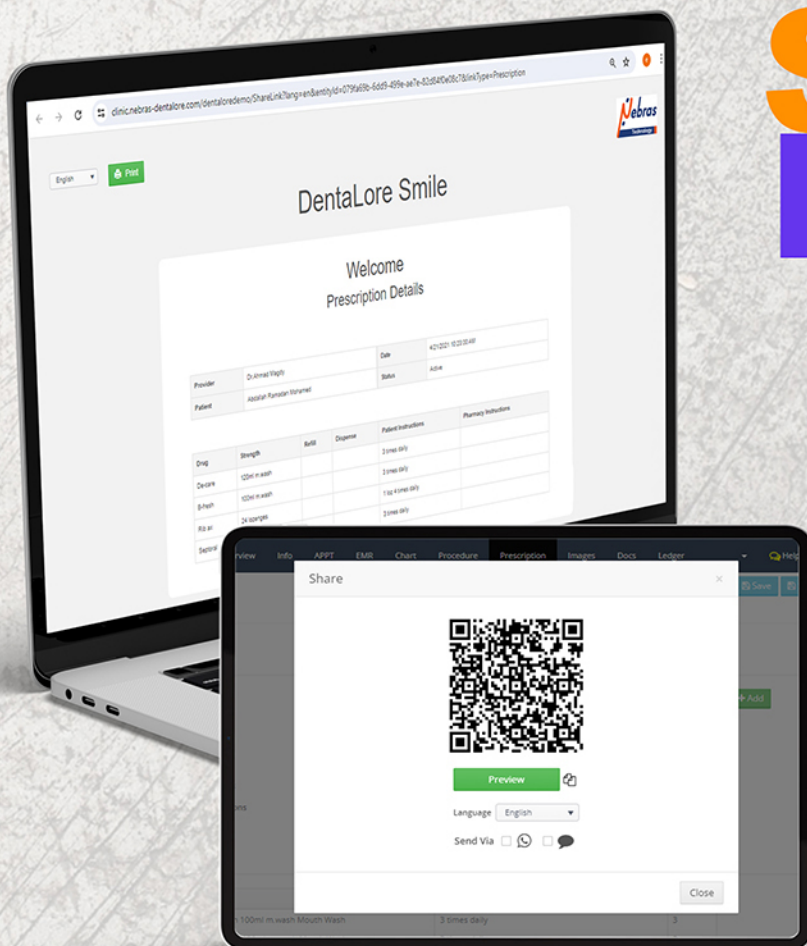

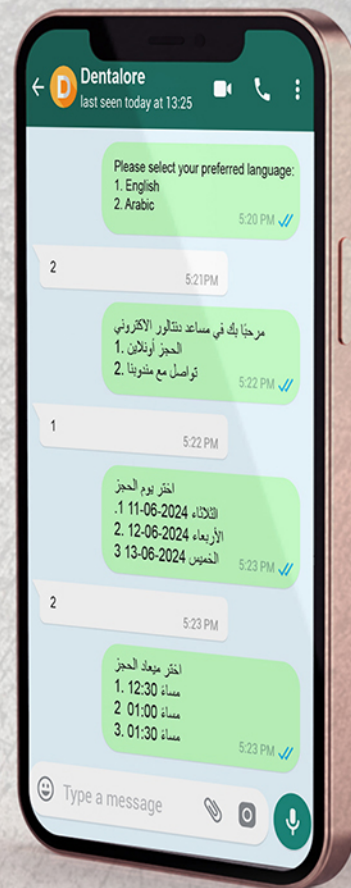

Keep your patients engaged with personalized marketing! Send congratulations for special occasions and run targeted campaigns that boost clinic revenue and enhance patient loyalty.

# WhatsApp Chatbot

Revolutionize your customer service with a smart WhatsApp chatbot. Available 24/7 to answer questions, schedule appointments, and handle patient support, the chatbot reduces workload, strengthens relationships, and helps attract new patients—all while collecting valuable data for targeted marketing.

## Shared Links

Easily share patient files, bills, and documents via a secure link, eliminating the need for repeated visits to the clinic. This feature improves communication with labs and ensures patients receive comprehensive care, all while reducing unnecessary phone calls.

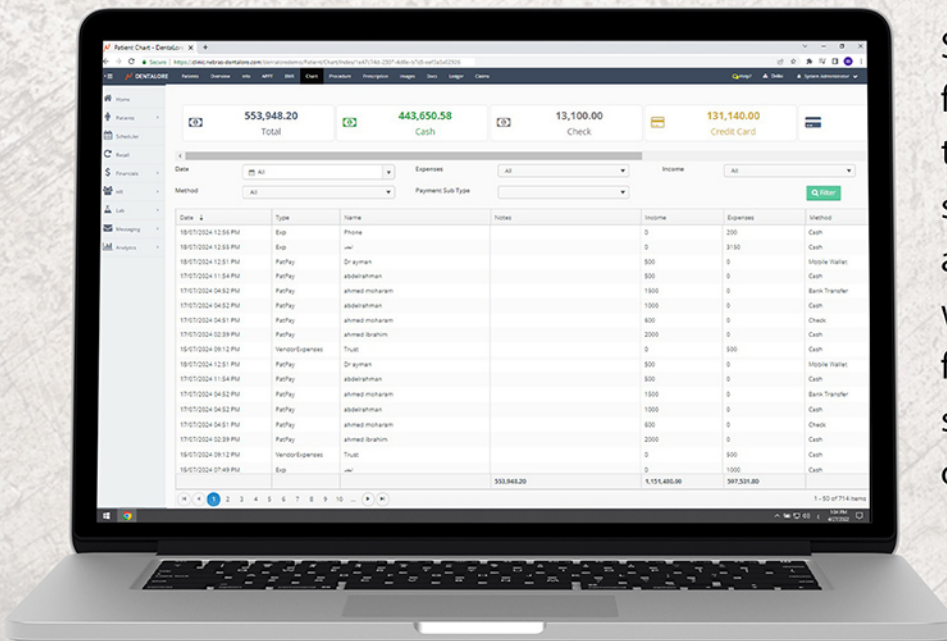

# Internal Chat

Improve communication within your medical team with a secure internal chat feature. Share vital information, coordinate tasks swiftly, reduce errors, and ensure accurate diagnoses—streamlining clinic operations and enhancing teamwork.

# Treasury Management

Stay on top of your clinic's finances with a seamless treasury management system. Track all accounts across multiple banks and wallets, ensuring a clear financial picture that supports profitability and operational efficiency.

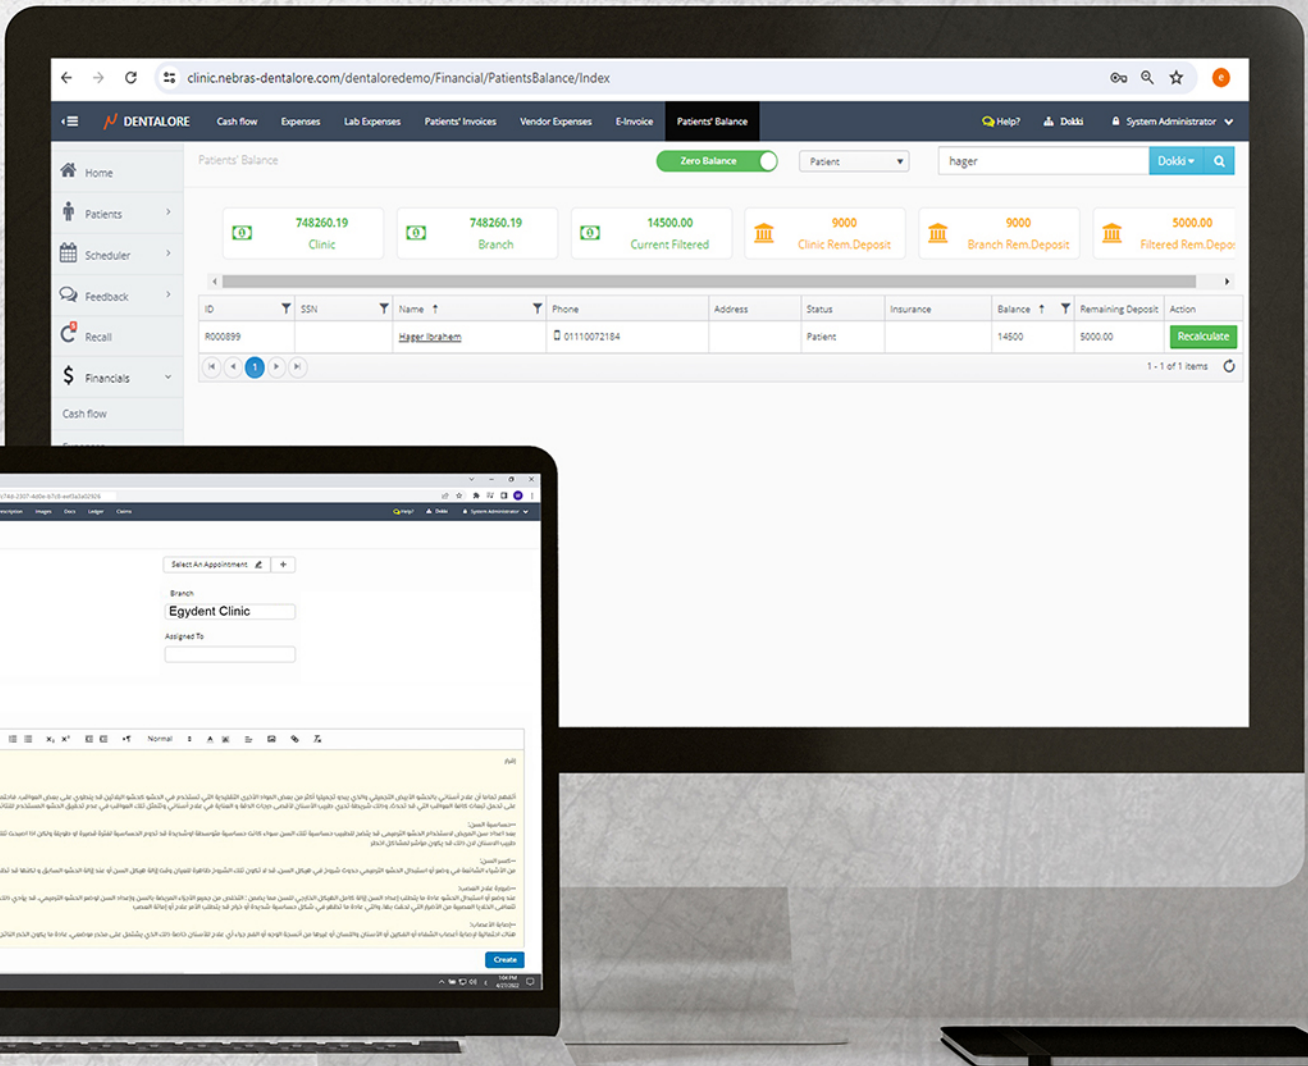

# Patient Geolocation Map

Gain insights into your patients' locations with geolocation tracking. Pinpoint patient distribution areas, target your marketing efforts more effectively, and ensure better patient care by understanding where your patients are.

# Patient Wallet

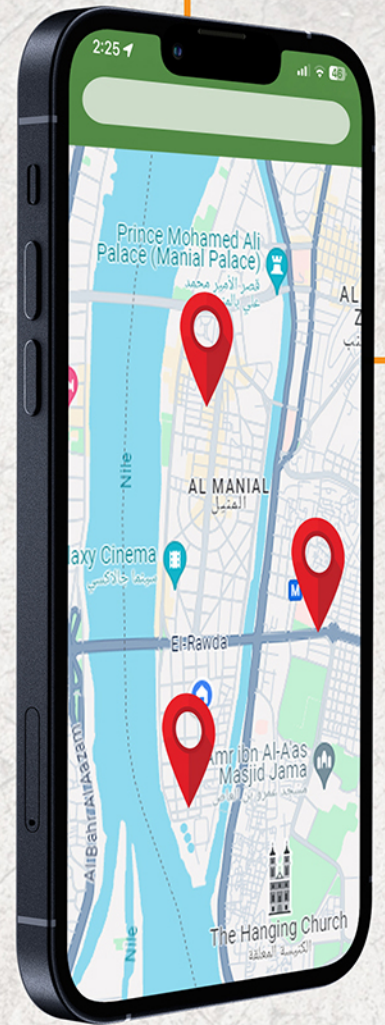

Empower your patients with the ability to make prepayments and deposits into their own digital wallet. This feature enhances billing efficiency, simplifies payment processes, and streamlines communication with patients.

# Notification System

Ensure your team stays on top of tasks and appointments with an automated notification system. Reminders for appointments, treatments, and daily tasks help reduce errors, keeping everyone in sync and avoid missed deadlines.

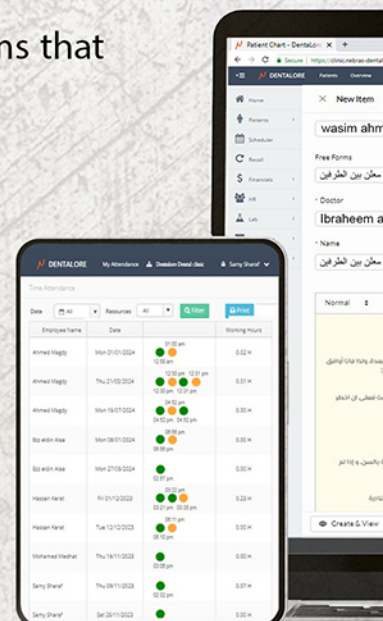

# Consent Forms

Simplify the consent process with digital patient agreements for each procedure. Get written approval through customized, easy-to-use forms that protect you legally and reduce the risk of lawsuits.

# Attendance System

Take control of your clinic's workforce with an efficient attendance management system. Track employee locations, monitor performance, and make data-driven decisions to improve staff efficiency and overall clinic performance.

# Why Dentalore

Dentalore is the ultimate solution for managing your clinic effortlessly, without the hassle of paper files. From patient records and treatment plans to billing and clinic finances, manage everything in one secure system, accessible from anywhere inside or outside your clinic. With data hosted on Microsoft Azure, enjoy top-notch security, unlimited storage, and complete data control. Plus, a full technical support team is available 24/7 to solve any issues you encounter. Connect and manage multiple clinic branches with ease, while enjoying free updates and flexible language options.
